Brief History

StrongHer Fitness Spot (SFS) is a women-only fitness center founded by Lerato Khanyile in South Africa with the vision of creating a safe and empowering environment where women can focus on their physical and mental well-being. The idea of this gym emerged from the sexual harassment Lerato faces at the gym and male superiority. Many women in South Africa often feel unsafe or uncomfortable in public spaces, including mixed-gender gyms, which can discourage them from participating in fitness activities.

Recognizing this problem, Lerato established SFS as a space designed exclusively for women. The purpose of the organization is to provide a supportive and secure fitness environment where women can exercise confidently without fear of harassment, judgement, or intimidation. The gym focuses not only on physical training but also on empowering women through wellness programs, group fitness sessions, and motivational workshops that promote confidence, independence, and self-care.

From its founding, SFS aimed to build a strong community among women by encouraging, mutual support and inclusivity to also trans women, the gym promotes the idea that fitness can be a powerful tool for improving both physical health and emotional strength. By offering services such as personal training, group classes, and wellness guidance, the organization seeks to help women achieve healthier lifestyles while fostering a sense of belonging.

Overtime, SFS has positioned itself as more than just a fitness centre. It represents a movement that advocates for women's empowerment and safety in South Africa. By responding to the social challenges faced by many women, the organization contributes to creating a positive and uplifting space where women can reclaim confidence, build strength, and support one another.

Market Problem:

Many women in South Africa face safety concerns, intimidation, and limited access to female-focused fitness environments, which discourages them from participating in regular exercise. This creates a significant gap in the market for a women-only gym like StrongHer that provides a safe, comfortable, and empowering fitness space. Research shows that 79% of South African women feel unsafe when running or exercising in public spaces, often due to harassment or fear of attack. This fear limits their ability to engage in physical activity freely and consistently. Additionally, gender inequality in sports and fitness access remains an issue. In South Africa, only about 23% of women participate in sports, and participation rates are even lower for some groups of women. This highlights a large untapped market of women who could benefit from more accessible and supportive fitness environments.

Key Statistics

Motivation:

StrongHer Fitness Spot (SFS) is an all-inclusive women fitness gym designed to provide a safe, supportive, and empowering environment where women can work

toward their health and fitness goals without feeling intimidated or uncomfortable. The gym offers a range of services tailored specifically to women's physical, emotional, and wellness needs.

StrongHer is different from traditional gyms is its focus on creating an inclusive female-centered fitness experience. Unlike mixed gyms where some women or trans women may feel judged or uncomfortable, StrongHer offers a judgment free and motivating space where members can build confidence and feel supported by trainers and other women.

Another key feature of StrongHer is its community-driven approach. The gym encourages a sense of sisterhood through group classes, fitness challenges, and wellness events that help members stay motivated and connected. This supportive environment helps women remain consistent with their fitness routines.

Additionally, StrongHer integrates modern fitness trends and technology, such as online workout options, social media fitness challenges, and wellness workshops. These features allow the gym to reach more women and provide flexible fitness solutions beyond the physical gym space.

Objectives:

1. Increase website Traffic

- Publish blog posts on topics like *"5 Wellness Tips for women"* or *"Recovery Techniques after a tough workout"* optimized for search engines.

- Promote these posts via social media platforms like Instagram and Facebook, where the target audience is active or have podcast talks about the brand.
- Furthermore, collaborate with local fitness influencers, wellness coaches, and women-focused brands to promote the gym. Influencers can share their workout experiences at StrongHer, which helps build trust and credibility among their followers. Partnerships with local businesses such as beauty salons, wellness spas, and healthy food brands can also help attract customers who are interested in health and self-care
- Goal: Drive more women to discover StrongHer online and learn more about its services.

2. Generate Leads

- Offer 10% off beginner's fee or free downloadable resources such as *"Home Workout Guide for Busy Women"* or *"Beginner's Recovery Routine"* in exchange for email addresses.
- Use newsletter sign-ups to nurture potential members with tips, promotions, and upcoming events.
- Goal: Build a database of interested women who can be converted into members.

3. Sell Memberships and services

- Integrate an online booking and payment system for personal training, group fitness classes, or recovery sessions like yoga, stretching etc. to prevent carrying cash.
- Promote special offers to first-time members or package deals for multiple wellness services

- Goal: Convert website visitors into paying clients efficiently.

4. Provide Valuable Information

- Create a blog or resource hub with content such as *“How to recover safely after a workout”*, *“Nutrition tips for stronger women”*, or *“defence classes for beginners”*
- Include FAQ pages and safety tips to address concerns about women-only fitness spaces, security and privacy.

-Goal: Position StrongHer as an expert in women’s fitness, wellness and recovery, helping visitors make informed decisions that include safety.

Lists of Resources/Assets:

1. **Membership Subscriptions**=The main source of income can come from monthly or annual gym memberships that give members access to the gym facilities and equipment. Different membership tiers will allow customers to choose packages that suit their needs.
2. **Personal Training Sessions**=Members can pay extra for one-on-one training sessions with certified trainers who provide personalized fitness programs and coaching.
3. **Group Fitness Classes**=Specialized classes such as HIIT, yoga, Pilates, dance fitness, and bootcamps may be offered as paid add-ons or included in premium memberships.
4. **Wellness and Nutrition Coaching**=StrongHer can generate revenue by offering nutrition consultations, wellness programs, and lifestyle coaching to help members achieve their health goals.
5. **Wellness and recovery therapy** as well for body massages and physiotherapy.

StrongHer will adopt a tiered pricing strategy, where customers can choose between basic, standard, and premium packages. This strategy makes the gym accessible to a wide range of customers while also offering higher-value services for those willing to pay more.

Special promotions such as student discounts, referral rewards, and seasonal offers may also be used to attract new members and increase retention.

List of Figures:

To successfully launch SFS, an estimated R1.5 million – R2 million in startup funding will be required. This funding will support the setup, equipment, marketing, and operational costs during the first 12 months of operation, allowing the gym to establish itself and grow its membership base.

Total Estimated Funding Needed

Approximately: R1,800,000

1. Gym Equipment – R700,000

This will cover the purchase of essential fitness equipment such as treadmills, stationary bikes, squat racks, dumbbells, resistance machines, and workout accessories. High-quality equipment is necessary to provide members with a safe and effective training experience.

2. Facility Setup and Renovation – R450,000

This includes rent deposits, interior design, flooring, mirrors, lockers, showers, lighting, and branding inside the gym. Creating a modern and comfortable environment is important for attracting and retaining members.

3. Marketing and Promotion – R200,000

Funds will be used for digital advertising, social media campaigns, influencer collaborations, promotional materials, and the grand opening event. Effective marketing will help StrongHer attract early members and build brand awareness.

4. Operational Costs – R300,000

This covers the first few months of operational expenses such as staff salaries, utilities, internet services, cleaning services, and maintenance.

5. Website and Technology – R100,000

This includes developing the gym website, membership management software, booking systems for classes, and online training platforms.

6. Emergency and Contingency Fund – R50,000

A reserve fund to manage unexpected costs or business risks during the early stages of operation.

7. Financial Forecast (12-24 months)

Total Revenue:	Total Expenses:	Expected Burn Rate	Months of Runway
R2,400,000	R1,800,000	R150,000 per month	12 months

User Persona (Target Market):

The primary target market for StrongHer consists of women who are looking for a comfortable, supportive, and female-focused fitness environment. The gym aims to attract women who want to improve their physical health, build confidence, and be part of a motivating fitness community in urban areas where gym culture and health awareness are growing. Cities with large populations and active lifestyles provide a strong customer base and higher demand for specialized fitness services.

Site Map:

- **Index page**= (usually called index.html) is the main or home page of a website. It is the first page users see when they visit your site.

According to the website of StrongHer fitness spot. It is structured into several key sections that guide users through the site:

1. Navigation Bar (Header Section)

Located at the top of the page, the navigation bar allows users to move to different parts of the website.

Main links include:

- **Home** – takes users back to the homepage.
- **Services** (dropdown menu):
 - Fitness Equipment , Wellness & Recovery
 - Monthly Events
 - Her Spot Online
- **Gallery** (dropdown menu):
 - Weights and Machine Floor
 - Wellness Centre
 - Events

- **About** – links to About page
- **Contact** – links to Contact page
- This section ensures **easy navigation and accessibility** across the website.

2. Slideshow / Hero Section:

Below the navigation bar is a slideshow (carousel) displaying gym images.

Features:

- 5 rotating images (Gym1–Gym5)
- Captions for each slide
- Previous and next buttons
- Navigation dots

> This section is used to showcase the gym environment and Capture user attention visually.

3. Services Section:

This section introduces the main offerings of StrongHer Fitness Spot.

Heading:

- “Available Services”
- Short description: “Select your desired service below”

Service cards include:

1. **Wellness and Recovery** ○
Hydration therapy and many more

d) Newsletter Section

- Link to contact page
- Email subscription form

○ Images= this includes of images and videos specifically for the business such as the establishment and the equipment in the fitness centre, also including the wellness and recovery segment provided inside the establishment.

○ CSS Stylesheet= CSS is used to control the appearance and layout of a website. Your stylesheet.css acts as the visual and layout structure of the entire website. It is organized into sections that correspond directly to different pages and components (Index, About, Contact, and shared elements). This includes:

1. Global Styles (Applies to All Pages)

- Resets margins, padding, and box sizing
- Defines general body styling:
 - Font
 - Background colour
 - Flex layout for full-page structure

>This ensures consistent design across index, about, and contact pages

2. Slideshow Section (Index Page Only)

- Classes: .slideshow-container, .mySlides, .prev, .next, .dot •

Controls:

- Image display ◦
- Navigation arrows ◦
- Animation (fade effect)

> Works with JavaScript to create the homepage slider.

3. Navigation System (All Pages)

- Classes: .navbar, .nav-links, .submenu, .logo

Features:

- Horizontal menu (desktop view)
- Dropdown submenu
- Hover effects

> Links all pages like the index (home), about, contact.

4. Hamburger Menu (Mobile Navigation)

- Classes: .hamburger, .nav-links.open, .submenu.open

Features:

- Responsive design for smaller screens
- Collapsible navigation menu
- Toggle animation

○ Ensures mobile-friendly navigation across all pages.

5. Index Page Styles (Services Section)

- Classes: .services-section, .services-grid, .card

Layout:

- Grid system for services
- Card-based design
- Buttons for actions

> Specifically styles the homepage content.

6. Contact Page Styles

- Classes: .contact-section, .form-container, input fields

Features:

- Styled form layout
- Input fields and hover effects
- Submit button design

> Supports the contact.html page functionality.

7. About Page Styles

- Classes: .about-section, .about-img, .values, .highlight

Layout:

- Centered content
- Profile image styling
- Grid layout for core values
- Highlighted text for emphasis

> Specifically designed for the about.html page

8. Footer (All Pages)

- Classes: .footer-logo, .footer-links, .footer-contact, .footer-newsletter

Features:

- Multi-column layout
- Links, contact info, and newsletter form
- Responsive design (adjusts for smaller screens)

Appears consistently across:

- Index
- About
- Contact

- JavaScript=JavaScript is a programming language used to make websites interactive and dynamic. Your JavaScript acts as a shared functionality layer that supports navigation and interactivity across multiple pages (Index, About, Contact). It does not directly link pages via URLs, but it controls how users move through and interact with the site's navigation and content.

1. Slider Functionality (Mainly on Index Page)

The JavaScript controls a slideshow feature:

- show slides () → Displays one slide at a time
- plus Slides (n) → Moves forward/backward
- current Slide (n) → Jumps to a selected slide

How it fits into the sitemap:

- Primarily used on index.html (Home page)
- Enhances the homepage with dynamic content
- Not required for About or Contact pages

2. Navigation Menu (Links All Pages)

The most important connection between pages comes from the navigation menu controlled by JavaScript:

a) Hamburger Menu Toggle

- Opens/closes mobile navigation
- Uses:
 - hamburger button
 - navLinks container

> This allows users to access:

- Home (index.html)
- About (about.html)
- Contact (contact.html)

b) Submenu Toggle (Mobile View)

- Handles dropdown menus on smaller screens
- Uses “. submenu-toggle” elements
- This supports:
 - Nested navigation (e.g., sections under main pages)
 - Better usability on mobile devices

3. How JavaScript Links the Pages Together

Although JavaScript does not directly load pages, it enables navigation between them by:

- Making the menu responsive and clickable
- Allowing users to open navigation links easily
- Supporting mobile-friendly browsing

Refinements and Improvements:

Improvements made in Part 2 from part 1 is that the index page has a service page, slideshow of images, a pink background-colour and a footer. The about page contains the logo of the business and pink background with elements of different fonts and the values are boxed. The Contact page contains the contact form that hovers over your email, subject, name and last name. Footer at the bottom with quick links, newsletter, slogan and contact information. JavaScript is included to support navigation and interactivity across multiple pages, and the CSS stylesheet acts as a visual and layout structure of the entire website. It is organized into sections that correspond directly to different pages and components (Index, About, Contact, and shared elements). Included the business logo in the contact page.

Furthermore, improvements made in part 3 from part 2 is that part 3 contains a services page that contains components of the fitness equipment the gym possesses, a cardio zone and group classes with a variety to accommodate diverse consumer needs and wants. Wellness and recovery section that contains IV hydration therapy, stretch zone and meditation sessions. Online fitness workouts and they ranges, and lastly monthly events all containing a brief description and prices and membership packages at the very end. Functionality of clicks on home page, about, contact and service pages.

Implementation of JavaScript/ jQuery:

JavaScript is implemented in the StrongHer Fitness Spot website to improve the interactivity, user experience, and navigation functionality altogether. The website links an external JavaScript file through the following code: `<script src="./javascript/script.js"></script>`. This external JavaScript file allows the website to perform dynamic actions that cannot be achieved using HTML and CSS alone.

1. Slideshow Functionality

One of the main uses of JavaScript on the website is the implementation of the image slideshow displayed on the home page. The slideshow contains multiple fitness images and allows users to navigate through them using previous and next buttons. JavaScript functions such as *plusSlides()* and *currentSlide()* are used to control the movement between slides and display the selected image. This creates a more engaging visual experience for visitors and helps showcase the gym's facilities and services to its target audience .

2. Navigation Menu Interaction:

The website includes a responsive navigation bar with a hamburger menu. JavaScript is likely used to toggle the visibility of navigation links when users access the website from mobile devices. This ensures that the website remains user-friendly across different screen sizes and devices.

3. Submenu Functionality:

The Services menu contains a submenu with additional options such as Fitness Equipment, Wellness & Recovery, Monthly Events, and Her Spot Online. JavaScript can be used to display and hide these submenu items when users click or hover over the Services option, improving navigation and making information easier to access.

4. User Engagement:

JavaScript enhances user engagement by allowing visitors to interact with elements such as:

- Slideshow navigation controls
- Service buttons (e.g., "Book Now" and "Join Class")
- Newsletter subscription forms
- Mobile navigation menus

These interactive features make the website more appealing and encourage users to explore the available services.

5. Form Validation and error Checking:

JavaScript can also be implemented in the STRONGHER Fitness Spot website to perform client-side form validation. This helps ensure that users enter correct information before submitting forms, improving data accuracy and user experience.

Detecting incorrect email addresses by JavaScript can validate email addresses by checking whether the entered email follows the correct format, such as including an "@" symbol and a valid domain name.

Example:

Correct: user@gmail.com

Incorrect: usergmail.com

Implementation of SEO:

Search Engine Optimization (SEO) is defined as the technique of improving a website's recognition on search engines such as Google or on any social media platforms. Effective SEO assists potential customers find the StrongHer Fitness Spot website when searching for women-only gyms, fitness classes, or wellness services.

1. Optimized Page Titles:

- The website uses a descriptive page title: <title>StrongHer Fitness Spot</title>
- This helps search engines understand the purpose of the website and improves its chances of appearing in relevant search results. A more optimized title could be: "STRONGHER Fitness Spot | Women's Gym & Wellness Centre in South Africa". This includes important keywords that potential customers are likely to search for.

2. Use of relevant keywords:

SEO is strengthened by including keywords related to the business throughout the website content, these keywords assist search engines to match the website to users searches.

Examples include:

- Women's gym
- Fitness classes
- Personal training
- Wellness and recovery
- Online fitness coaching
- Women's fitness South Africa

3. Quality Content:

The website contains service descriptions such as:

- Wellness and Recovery
- StrongHer Fitness Online
- Fitness Equipment
- Monthly Events

Providing informative and relevant content helps improve search rankings while giving visitors useful information about the gym's services.

4. Meta Description:

To further improve SEO, the website can include a meta description in the head section:

```
<meta name="description" content="STRONGHER Fitness Spot is a women-only gym offering fitness training, wellness services, online coaching, and community support in South Africa.">
```

This description may appear in search engine results and encourages users to click on the website.

Going Live Steps:

Step 1: Create a GitHub Account and verify using your email address.

Step2: After logging in, click the “+” icon, select and create a new repository entering your student number- Part 3 as the main branch, select public and click create repository.

Step 3: Upload all required files such as the index, about, contact, services page, images, JavaScript and CSS folders.

Step4: Commit the files by adding all required documentation and saving all the changes.

Step 5: Enable GitHub Pages

1. Open your repository.
2. Click Settings.
3. Select Pages from the left menu.
4. Under Build and Deployment:
 - Source: Deploy from a Branch
 - Branch: main
 - Folder: /root
5. Click Save.

Step 6: Wait for deployment by allowing GitHub to build your website automatically after a few minutes and providing you a URL link to forward or send to anyone who wants to visit your website

Conclusion:

In conclusion, StrongHer Fitness Spot was founded with the mission of empowering women through fitness while addressing the safety concerns that many women experience daily. Through its women-only environment and supportive community, the organization continues to promote strength, confidence, and well-being among women. Where every woman can rise stronger than yesterday. With this investment will allow StrongHer to establish a fully equipped and modern fitness space designed specifically for women, while also building brand awareness and attracting a strong membership base through targeted marketing and community engagement strategies. By securing this funding, StrongHer will be able to successfully launch its services, grow its customer base, and position itself as a leading women-only fitness brand in South Africa.
